### **PLANTING SEASONS**

The **SPRING PLANTING SEASON** begins as soon as the frost is out of the ground and continues until early June. Evergreens and Perennials can be safely transplanted until the latter part of June.

The **FALL PLANTING SEASON** for Evergreens begins about the middle of August and continues through September. Deciduous Trees and Shrubs can be safely moved after we have had one or two frosts and continued until the ground is frozen. Perennials do best when moved during September and before the middle of October.
